

1 SEAMING BOARD AND METHODS OF INSTALLING FLOOR COVERING

2

3

ABSTRACT

4

5 Disclosed is a seaming board including opposing ends,
6 opposing upper and lower major surfaces and attached
7 abutment structure. The abutment structure is attached to
8 the seaming board proximate one of the ends, and is
9 adjustable between a closed condition overlying the upper
10 surface and an open condition away from the upper surface.
